Innovation Challenges are designed to encourage and direct investment in solutions that address a wide range of social, economic and environmental sustainability issues. Some Innovation Challenges will take the form of new credits, while others will simply identify sustainability issues that additional research and innovation will help to address.

The following Innovation challenges are available in New Zealand. The table shows which tools they are currently accepted for. Please click on the innovation challenge title to access Fact Sheets for individual Innovation Challenges. \*indicates innovation challenges that are only applicable to multi-unit Homestar projects.
